Dear Hiring Committee,

I saw the job post on **the LPL Financial careers website** and thought I'd be a good fit for it.

I am a Master's student in Computer Science at the University of Cincinnati, graduating December 2026, looking for a role as a **Software Engineer Intern** at **LPL Financial Holdings**. With hands on experience building backend automation, full stack applications, and cloud based systems, I am excited about the opportunity to contribute to **LPL Financial** and support the team building tools for the independent broker-dealer platform.

Here are reasons that make me a great fit for the role:

- **Hands on programming experience:** I have built production software in Java, Python, and JavaScript across internships and graduate research, including a full stack React and MySQL workflow application that digitized departmental record management and improved operational efficiency by 40%.

- **Software development, testing, and APIs:** At Siemens Industry Software, I automated Teamcenter X infrastructure workflows with Python and REST APIs, replacing legacy scripts and cutting deployment time by 40%. As Quality Coach and SonarQube Specialist, I increased automated test coverage from 35% to 78% by enforcing coding standards and CI/CD quality gates.

- **Cloud platforms and DevOps:** I migrated 40+ production environments to Kubernetes using ArgoCD, Helm, and GitLab CI/CD, and designed an Ansible based Blue-Green deployment framework that reduced production upgrade downtime by 50%, working across AWS with exposure to Azure and Google Cloud Platform.

- **AI assisted development and scalable applications:** My current graduate research applies large language models to Android bug reproduction, and my PolicyPilot project used Google Gemini and a 17-tool MCP server in a full stack TypeScript application, reflecting my interest in using AI assisted tools to improve software quality and productivity.

I am available for full-time work after December 2026. As a Master's student at the University of Cincinnati and someone who values professionalism and growth, I am enthusiastic about contributing to LPL Financial's mission of supporting financial advisors and their clients.

Please find my CV attached below. I look forward to hearing from you. I would be excited to help build reliable, scalable applications for a platform trusted by advisors nationwide.
