Dear Hiring Committee,

I saw the job post on the careers website and thought I'd be a good fit for it.

I am a Master's student in Computer Science at the **University of Cincinnati**, graduating December 2026, looking for a role as a **Research Associate, Cyber Library** with the **Ohio Cyber Range Institute**. With hands on experience in structured program assessment, quality coaching, mentoring, and technical documentation, I am excited about the opportunity to contribute to OCRI and support its cybersecurity library, portfolio, and educational programming across the state.

Here are reasons that make me a great fit for the role:

- **Portfolio and assessment support:** As a Graduate Researcher at UC, I designed a structured evaluation methodology comparing my LLM based approach against a published baseline across 53 assessed runs on 20+ Android apps, collecting, interpreting, and reporting performance data, work directly transferable to developing evaluations and assessments for portfolio artifacts.

- **Curriculum and program evaluation:** At Siemens Industry Software, I served as Quality Coach and SonarQube Specialist, developing assessment criteria and quality gates that increased automated code coverage from 35% to 78%, experience that maps closely to evaluating cybersecurity curricular materials and developing program assessments.

- **Training and educational programming:** I mentored 5 software engineers through structured onboarding, building training documentation and evaluation checkpoints to track progress, skills I would bring to expanding training and programming for the cybersecurity library and OCRI educational events.

- **Collaboration and reporting to leadership:** Throughout my roles, I have collected and reported technical findings to stakeholders, from production upgrade diagnostics at Siemens to research evaluation results at UC, and I communicate clearly with diverse groups, from engineers to leadership.

I am available for full time work after my graduation in December 2026. As a Master's student at the University of Cincinnati and someone who values professionalism and growth, I am enthusiastic about contributing to OCRI's mission of advancing cybersecurity education, workforce, and economic development across Ohio.

Please find my CV attached below. I look forward to hearing from you. I would be excited to support a program that brings cutting edge cybersecurity education and resources to students and professionals statewide.

Regards,
