Seattle, WA

SUMMARY

Data Engineer and M.S. Computer Science candidate (Dec 2026) with 2+ years building production cloud automation, SQL backed applications, data pipelines, and reliability systems using Python, SQL, AWS, Spark, PostgreSQL, Docker, and Kubernetes.

EDUCATION

Master of Science in Computer Science Aug 2024 to Dec 2026
University of Cincinnati
Relevant Coursework: Database Theory, Intelligent Data Analysis, Advanced Algorithms.

Bachelor of Engineering in Computer Engineering Aug 2018 to Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Machine Learning.

TECHNICAL SKILLS

Programming: Python, SQL, Java, JavaScript, TypeScript, Go, C/C++, Bash.

Data Engineering: PySpark, Apache Spark, Delta Lake, ETL Pipelines, Data Modeling, Data Quality, pandas, NumPy.

Databases: PostgreSQL, MySQL, Elasticsearch, Redis, MongoDB, Oracle DB.

Cloud & DevOps: AWS (EC2, S3, Lambda, SQS), Docker, Kubernetes, ArgoCD, Helm, Terraform, Linux, Jenkins.

Web & Backend: FastAPI, Flask, Node.js, React, REST APIs, Microservices, GitLab CI/CD, Git.

WORK EXPERIENCE

Graduate Researcher | University of Cincinnati Feb 2026 to Present

- Designed memory augmented LLM pipeline separating video extraction from automation across **53 runs** on **20+ Android apps**.
- Reduced average run latency **25.7x** while preserving task completion fidelity through structured run artifacts and evaluation logs.

Software Development Engineer | Siemens Industry Software Jul 2022 to Jun 2024

- Automated **Teamcenter X** infrastructure workflows with Python and Boto3, reducing deployment time **40%** across AWS environments.
- Executed **44 production upgrades** in 4 months, troubleshooting Linux, EC2, database, and service reliability issues.
- Built Terraform and Ansible automation for environment provisioning, standardizing setup across **40+ production environments**.
- Migrated **40+ production environments** to Kubernetes using ArgoCD, Helm, GitLab CI/CD, Amazon EFS, and Vault.
- Increased automated code coverage from **35% to 78%** by enforcing coding standards and CI/CD quality gates.

Software Developer Intern | Siemens Industry Software Mar 2022 to Jun 2022

- Automated AWS provisioning with Terraform and Go Terratest, cutting deployment time **30%** and catching **95%** misconfigurations.

Software Developer Intern | Government of Maharashtra, Water Resource Department Sep 2021 to Dec 2021

- Built React and MySQL workflow app digitizing record management and improving departmental operating efficiency by **40%**.

PROJECTS AND RESEARCH

NYC Mobility Forecasting [PySpark, Delta Lake, SQL, FastAPI, PostgreSQL] Jul 2026

- Built Spark medallion pipeline creating **2.3M row** hourly demand dataset from trip, weather, and geospatial data.
- Modeled demand across **263 zones**, improving MAPE from **18.77% to 16.52%** and cutting RMSE **43%**.

Spotify Personal Analytics Platform [Python, FastAPI, SQL, PostgreSQL, pandas] Jul 2026

- Engineered Python ETL pipeline processing **71K+** streaming events with rate limiting and retry handling.
- Designed PostgreSQL analytics schema with materialized views, indexes, and **16 SQL RPC functions** for low latency queries.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
