SUMMARY

Software Engineer and M.S. Computer Science candidate (Dec 2026) with production experience building Python backend automation, CI/CD pipelines, and operational tooling across large codebases. Comfortable with Linux, HPC/distributed job execution, relational databases, and web services.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Deep Learning, Intelligent Data Analysis, Database Theory.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Machine Learning, Object-Oriented Programming.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, TypeScript, SQL, C/C++, Go, Bash.

Web & Backend: Flask, FastAPI, Django, Node.js, REST APIs, Airflow, Celery.

Databases: PostgreSQL, MySQL.

Developer Tools: Git, Jenkins, Bitbucket, GitLab CI/CD, Poetry, Docker, Kubernetes, HPC, Linux, AWS, Terraform.

Data & Scientific Computing: pandas, NumPy, PySpark, scikit-learn, PyTorch.

WORK EXPERIENCE

Software Development Engineer —- Siemens Industry Software Jul 2022 – Jun 2024

- Built Python (Boto3) automation replacing legacy Ruby scripts for infrastructure build/deploy workflows, cutting deployment time **40%** across AWS environments and closing gaps in operational tooling.
- Triaged and resolved **44 production environment** failures in 4 months under time pressure, debugging across Linux, EC2, relational databases, and backend services in a large real production codebase.
- Designed Ansible-based Blue-Green deployment framework with rollback/recovery logic, cutting production upgrade downtime **50%** and improving pipeline execution reliability.
- Owned CI/CD and build infrastructure migration for **40+ environments** to Kubernetes using ArgoCD, Helm, and GitLab CI/CD, maintaining regression and deployment pipelines end to end.
- Served as Quality Coach/SonarQube Specialist, raising automated code coverage **35% to 78%**; mentored **5 engineers**, improving documentation and observability of team processes.

Software Developer Intern —- Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of AWS resources with **Terraform**, reducing deployment time by **30%**.
- Built **Go + Terratest** regression framework, catching **95%** of misconfigurations pre-production.

Software Developer Intern —- Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** workflow application that digitized record management, validated data entry, and improved operational efficiency by **40%**.

PROJECTS AND RESEARCH

NYC Mobility Forecasting [Python, PySpark, PostgreSQL, FastAPI, Docker] Jul 2026

- Built end-to-end data pipeline processing **2.3M-row** transportation dataset with PySpark/Delta Lake; served predictions via FastAPI + PostgreSQL/Redis backend, containerized with Docker, cutting RMSE **43%** over baseline.

PolicyPilot – Policy Intelligence Portal [Node.js, TS, React, Docker, Zod] May 2026

- Built full-stack TypeScript app (React SPA + Express REST API) with a **17-tool MCP server**; enforced Zod schema validation at every data boundary, eliminating a class of runtime type-mismatch bugs.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
