Dear Hiring Committee,

I saw the job post on **LinkedIn** and thought I'd be a good fit for it.

I am a Master's student in Computer Science at the University of Cincinnati, graduating December 2026, looking for a role as a **Staff Backend Engineer** at **Coupang**. With hands on experience building and operating Kubernetes based deployment platforms, automating cloud infrastructure, and maintaining distributed backend systems in production, I am excited about the opportunity to contribute to **Coupang** and support the team scaling its Kubernetes ecosystem and container orchestration platform.

Here are reasons that make me a great fit for the role:

- **Designing and implementing scalable services for Kubernetes infrastructure:** At Siemens Industry Software, I migrated 40+ production environments from process based deployments to Kubernetes using ArgoCD, Helm, GitLab CI/CD, Amazon EFS, and HashiCorp Vault, modernizing the deployment architecture end to end.

- **Driving reliability and efficiency across container orchestration:** I designed an Ansible based Blue-Green deployment framework that reduced production upgrade downtime by 50%, and executed 44 production environment upgrades in 4 months, diagnosing and resolving live infrastructure issues across Linux, EC2, databases, and containerized services.

- **Backend development and distributed systems expertise:** I have hands on experience with Java, Python, Go, and C/C++, and I automated Teamcenter X infrastructure workflows with Python (Boto3), replacing legacy Ruby scripts and cutting deployment time by 40% across AWS environments.

- **Collaboration and engineering excellence:** As Quality Coach and SonarQube Specialist for the Agile Release Train, I increased automated code coverage from 35% to 78% by enforcing coding standards and CI/CD quality gates, and mentored 5 software engineers through structured onboarding.

I am available to work with you after my graduation in December 2026. As a Master's student at the University of Cincinnati and someone who values professionalism and growth, I am enthusiastic about contributing to **Coupang** and helping scale the platform that powers its next-generation commerce infrastructure.

Please find my CV attached below. I look forward to hearing from you. I would be excited to help build the reliable, large scale infrastructure behind Coupang's mission to disrupt commerce.
Regards,
