Dear Hiring Committee,

I saw the job post on **LP Analyst's careers page** and thought I'd be a good fit for it.

I am a Master's student in Computer Science at the University of Cincinnati, graduating December 2026, looking for a role as a **Private Equity Data Operations Analyst** at **LP Analyst**. With hands on experience validating, structuring, and automating large volumes of production data, I am excited about the opportunity to contribute to **LP Analyst** and support your clients' transparency into private markets portfolios.

Here are reasons that make me a great fit for the role:

- **Interpreting and validating structured data with strong attention to accuracy:** At Siemens Industry Software, I executed 44 production environment upgrades in 4 months, diagnosing and validating infrastructure data across Linux, EC2, databases, and services, and served as Quality Coach, increasing automated code coverage from 35% to 78% by enforcing data and quality standards.

- **Preparing and structuring data for downstream systems:** I built a data pipeline processing a 2.3M-row hourly transportation dataset across 263 zones, and engineered a 4-stage ETL pipeline handling 71K+ records with validation and retry logic, feeding a structured PostgreSQL analytics schema.

- **Comfort with Excel, SQL, and data tools:** I regularly build advanced Excel workflows (formulas, pivot tables) alongside SQL for querying and structuring relational data, and have hands on experience with Python, pandas, and reporting pipelines that support downstream analytics.

- **Collaborating across teams and communicating clearly:** At Siemens, I mentored 5 software engineers through structured onboarding and worked across teams to deliver production upgrades, building strong written and verbal communication habits in a collaborative, deadline-driven environment.

I am available to start after my graduation in December 2026. As a Master's student at the University of Cincinnati and someone who values accuracy, professionalism, and growth, I am enthusiastic about contributing to **LP Analyst** and helping deliver clear, reliable data to institutional investors.

Please find my CV attached below. I look forward to hearing from you. I would be excited to grow my expertise in private markets data while contributing to a team focused on transparency for leading institutional investors.

Regards,
