Dear Hiring Committee,

I saw the job post on **LinkedIn** and thought I'd be a good fit for it.

I am a Master's student in Computer Science at the University of Cincinnati, graduating December 2026, looking for a role as an **Entry-Level Data Scientist** at **SFORCE IT**. With hands on experience in Python data analysis, statistical modeling, and SQL, I am excited about the opportunity to contribute to SFORCE IT and help turn data into actionable insights.

Here are reasons that make me a great fit for the role:

- **Data cleaning, preprocessing, and EDA in Python:** In the NYC Mobility Forecasting project, I processed transportation and weather data with Pandas and scikit-learn into a 2.3M-row hourly demand dataset across 263 zones, running exploratory analysis to guide feature and model design.

- **Building and evaluating machine learning models:** I designed a two-stage Poisson hurdle model that improved forecast accuracy (MAPE 18.77% to 16.52%) and cut prediction error (RMSE) by 43% over a baseline Random Forest, and in my graduate research I ran comparative evaluations across model providers achieving a 25.7x latency reduction while preserving accuracy.

- **SQL and database work:** I designed a PostgreSQL analytics schema with materialized views, composite indexes, and 16 SQL RPC functions for the Spotify Analytics Platform, enabling low-latency aggregated queries for downstream reporting.

- **Dashboards and communication of insights:** I built a RESTful API serving real-time predictions to a React and map-based dashboard, and at Siemens I used CloudWatch utilization metrics to identify resource inefficiencies, directly informing a 40% reduction in monthly AWS spend.

- **Collaboration and analytical rigor:** As Quality Coach and SonarQube Specialist at Siemens, I increased automated code coverage from 35% to 78% and mentored 5 engineers, working cross-functionally to translate technical findings into clear, actionable standards.

I am available to work with you after my graduation in December 2026. As a Master's student at the University of Cincinnati and someone who values professionalism and growth, I am enthusiastic about contributing to SFORCE IT.

Please find my CV attached below. I look forward to hearing from you. I would be excited to bring a data-driven mindset to solving real business problems with your team.
Regards,
