Dear Hiring Committee,

I saw the job post on **Handshake** and thought I'd be a good fit for it.

I am a Master's student in Computer Science at the University of Cincinnati, graduating December 2026, looking for a role as a **Software Engineering Intern** at **Skillify**. With hands on experience building full-stack applications across React, TypeScript, Node.js, and PostgreSQL, I am excited about the opportunity to contribute to Skillify and Kinship Labs and ship features real students and users interact with daily.

Here are reasons that make me a great fit for the role:

- **Frontend development with React, Next.js, and TypeScript:** I built PolicyPilot, a full-stack TypeScript app with a React SPA and Express 5 REST API, and the Spotify Personal Analytics Platform with a React/MUI dashboard backed by TypeScript and Vite, translating requirements into functional, well-tested interfaces.

- **Backend API and database schema design:** I designed a 17-tool REST API with Zod schema validation at every data boundary, eliminating a class of runtime type-mismatch bugs, and built a PostgreSQL (Supabase) analytics schema with materialized views, composite indexes, and 16 SQL RPC functions for low-latency queries.

- **Testing and DevOps:** I implemented Vitest unit and integration tests and axe-core accessibility coverage on PolicyPilot, and at Siemens, I increased automated code coverage from 35% to 78% by enforcing CI/CD quality gates and participating in code review across an Agile Release Train.

- **Debugging and production troubleshooting:** At Siemens, I diagnosed and resolved live production infrastructure issues across 44 environment upgrades in 4 months and deployed code through GitLab CI/CD pipelines with Docker and Kubernetes.

I am available to work with you after my graduation in December 2026. As a Master's student at the University of Cincinnati and someone who values professionalism and growth, I am enthusiastic about contributing to Skillify's mission of helping young people build meaningful lives.

Please find my CV attached below. I look forward to hearing from you. I would be excited to help ship production features that power both Skillify and Kinship Labs for the students and organizations you serve.

Regards,
