SUMMARY

Detail-driven engineer with production experience validating, structuring, and automating large-scale data across cloud and financial-adjacent systems. Strong Excel/SQL fluency, rigorous attention to accuracy, and a track record of building data pipelines and quality processes using Python, SQL, and automation tools.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Database Theory, Intelligent Data Analysis, Advanced Algorithms.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Object-Oriented Programming.

TECHNICAL SKILLS

Data & Analysis: Excel (advanced formulas, pivot tables), SQL, pandas, NumPy, data validation, data structuring.

Programming: Python, Java, JavaScript, TypeScript, SQL, Go.

Databases: PostgreSQL, MySQL.

Reporting & BI Tools: Power BI (familiarity), Databricks, REST APIs, Git.

Cloud & Automation: AWS, Docker, Kubernetes, GitLab CI/CD, Terraform, Linux, Bash.

WORK EXPERIENCE

Graduate Researcher —- University of Cincinnati Feb 2026 – Present

- Designed data pipeline extracting and structuring behavioral data from video-based reports, validating outputs against a published baseline across 53 runs on 20+ apps for accuracy.
- Demonstrated **25.7x latency reduction** (39.4s vs 1012.1s avg per run) while preserving data accuracy and task-completion fidelity.

Software Development Engineer —- Siemens Industry Software Jul 2022 – Jun 2024

- Automated **Teamcenter X** infrastructure workflows with Python (Boto3), replacing legacy Ruby scripts and reducing deployment time by **40%** across AWS environments.
- Executed **44 production environment upgrades** in 4 months, validating and structuring infrastructure data across Linux, EC2, databases, and Teamcenter X services.
- Designed **Ansible-based Blue-Green deployment** framework, reducing production upgrade downtime by **50%**.
- Migrated **40+ production environments** to Kubernetes using ArgoCD, Helm, GitLab CI/CD, Amazon EFS, and HashiCorp Vault.
- Tracked and reported on **40+ environments** in Excel using pivot tables, VLOOKUP/INDEX-MATCH, and SUMIFS/COUNTIFS formulas for status inventory, upgrade reporting, and provisioning data validation.

Software Developer Intern —- Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of AWS resources with **Terraform**, reducing deployment time by **30%**.
- Developed **Go + Terratest** framework, catching **95%** of misconfigurations pre-production.

Software Developer Intern —- Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** workflow application that digitized departmental record management, structuring and validating operational records, improving efficiency by **40%**.

PROJECTS AND RESEARCH

NYC Mobility Forecasting [PySpark, Delta Lake, scikit-learn, SQL] Jul 2026

- Built data pipeline structuring and validating **2.3M-row** hourly transportation dataset across **263 zones**; designed two-stage model improving MAPE **18.77% to 16.52%** and cutting RMSE **43%** over baseline.

Spotify Analytics Platform [Python, SQL, pandas, PostgreSQL] Jul 2026

- Engineered 4-stage ETL pipeline processing **71K+** streaming records with validation, retry handling, and a PostgreSQL analytics schema with materialized views for low-latency reporting.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
