SUMMARY

Software Engineer and M.S. Computer Science candidate (Dec 2026) with production experience building and operating large-scale distributed cloud infrastructure at Siemens: container orchestration, service migrations, and automated deployment platforms using Python, AWS, Kubernetes, and Terraform across 40+ production environments.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Deep Learning, Database Theory.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Object-Oriented Programming.

TECHNICAL SKILLS

Programming: Java, Python, Go, Rust, C/C++, JavaScript, TypeScript, SQL.

Distributed Systems: Microservices Architecture, Serverless Architecture, REST APIs, WebSockets, System Architecture, API Design, Object-Oriented Design.

Databases: PostgreSQL, MySQL, DynamoDB, Elasticsearch, Redis.

Cloud & Infra: AWS (EC2, S3, Lambda, SQS, EFS), Docker, Kubernetes, ArgoCD, Helm, Terraform, Ansible, HashiCorp Vault, GitLab CI/CD, Linux, Bash.

Operations: On-call/Incident Response, Root-Cause Analysis, CloudWatch, SonarQube, Load Testing, Agile/Scrum.

WORK EXPERIENCE

Software Development Engineer —- Siemens Industry Software Jul 2022 – Jun 2024

- Migrated **40+ production environments** from process-based deployments to **Kubernetes** using ArgoCD, Helm, GitLab CI/CD, Amazon EFS, and HashiCorp Vault to modernize deployment architecture.
- Designed **Ansible-based Blue-Green deployment** framework with automated rollback, reducing production upgrade downtime by **50%** and enabling full recovery within 15 minutes.
- Executed **44 production environment upgrades** in 4 months, diagnosing and resolving live infrastructure issues across Linux, EC2, databases, and containerized services.
- Automated **Teamcenter X** infrastructure workflows with Python (Boto3), replacing legacy Ruby scripts and reducing deployment time by **40%** across AWS environments.
- Built self-service developer platform (dashboard + CLI/YAML automation) adopted by **15 engineers**, cutting environment provisioning turnaround by **70%** and start/stop/delete time by **90%**.

Software Developer Intern —- Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of AWS resources with **Terraform**, reducing deployment time by **30%**.
- Developed **Go + Terratest** framework, catching **95%** of misconfigurations pre-production.

Software Developer Intern —- Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** workflow application that digitized departmental record management, automated manual processes, and improved operational efficiency by **40%**.

PROJECTS AND RESEARCH

NYC Mobility Forecasting [PySpark, Delta Lake, FastAPI, PostgreSQL, Redis, Docker] Jul 2026

- Built distributed data pipeline forecasting NYC taxi/rideshare demand across **263 zones** (**2.3M-row** hourly dataset) via Spark medallion architecture; served real-time predictions through containerized REST API with Redis caching.

Spotify Personal Analytics Platform [Python, FastAPI, PostgreSQL, React, TypeScript] Jul 2026

- Engineered 4-stage ETL pipeline processing **71K+** streaming events with custom rate limiting and retry handling; designed PostgreSQL analytics schema with materialized views and **16 SQL RPC functions** for low-latency queries.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
