Glendale, CA

SUMMARY

Software Engineer with production experience in Java, Python, TypeScript, and full-stack development (React, Node.js, REST APIs, SQL/NoSQL). Skilled in object-oriented design, Git, Jenkins/Docker pipelines, peer review, and building applications with AI-powered tools and Generative AI APIs.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Deep Learning, Intelligent Data Analysis, Database Theory.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Machine Learning, Object-Oriented Programming.

TECHNICAL SKILLS

Programming: Java, TypeScript, Python, JavaScript, C/C++, SQL, Go.

Web & Backend: React, Node.js, REST APIs, Django, Flask, FastAPI, Object-Oriented Design, HTML/CSS.

Databases: PostgreSQL, MySQL, MongoDB (SQL & NoSQL).

Developer Tools: Git, Jenkins, Docker, GitLab CI/CD, AWS, Kubernetes, ArgoCD, Helm, Terraform, Linux, Bash, SonarQube, Azure, Google Cloud Platform.

AI & Data: Gemini, Vertex AI, Generative AI APIs, PyTorch, TensorFlow, scikit-learn, LangChain, pandas, NumPy.

WORK EXPERIENCE

Graduate Researcher —- University of Cincinnati Feb 2026 – Present

- Designed two-stage memory-augmented LLM pipeline integrating Generative AI APIs (Gemini) for Android GUI bug reproduction, evaluated against **ViBR** baseline across 53 runs on 20+ apps.
- Demonstrated **25.7x latency reduction** (39.4s vs 1012.1s avg per run) while preserving task-completion fidelity.

Software Development Engineer —- Siemens Industry Software Jul 2022 – Jun 2024

- Gathered and refined requirements with cross-functional stakeholders, then built REST API automation for **Teamcenter X** workflows with Python (Boto3), reducing deployment time by **40%** across AWS.
- Investigated and resolved **44 production incidents** in 4 months, diagnosing live infrastructure issues across Linux, EC2, SQL databases, and Teamcenter X services.
- Designed **Ansible-based Blue-Green deployment** framework using Jenkins CI/CD gates, reducing production upgrade downtime by **50%**.
- Migrated **40+ production environments** from process-based deployments to Kubernetes using Docker, ArgoCD, Helm, and GitLab CI/CD, collaborating cross-functionally to evaluate and roll out the solution.
- Served as Quality Coach and SonarQube Specialist leading peer reviews of code, solution designs, and system configurations, raising automated coverage from **35% to 78%**; mentored **5 engineers**.

Software Developer Intern —- Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of AWS resources with **Terraform**, reducing deployment time by **30%**.
- Developed **Go + Terratest** framework, catching **95%** of misconfigurations pre-production.

Software Developer Intern —- Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** workflow application that digitized departmental record management, automated manual processes, and improved operational efficiency by **40%**.

PROJECTS AND RESEARCH

PolicyPilot – Medical Benefit Policy Intelligence Portal [React, TypeScript, Node.js, Gemini API] May 2026

- Built full-stack TypeScript application (React UI, Node/Express API layer, PostgreSQL-backed data layer) with Zod schema validation at every data boundary.
- Integrated a Generative AI API (Gemini) and RAG-based ML pipeline with a 17-tool MCP server, adding intelligent automation for policy lookup consumable by external AI agents.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
