SUMMARY

Software Engineer and M.S. Computer Science candidate (Dec 2026) building full stack tools and serverless automation with Java, Python, React, Node.js, AWS Lambda, DynamoDB, and API Gateway. Production experience owning features end to end across frontend, backend, and database.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Deep Learning, Intelligent Data Analysis, Database Theory.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Machine Learning, Object-Oriented Programming.

TECHNICAL SKILLS

Programming: Java, Python, C/C++, JavaScript, TypeScript, SQL, Go.

Full Stack: React, Node.js, REST APIs, Django, Flask, FastAPI, Object-Oriented Design.

AWS Serverless: Lambda, API Gateway, DynamoDB, SNS, SQS, S3, CloudWatch, EC2.

Databases & Tools: PostgreSQL, MySQL, DynamoDB, Git, GitLab CI/CD, Jenkins, Docker, Kubernetes, Terraform.

WORK EXPERIENCE

Graduate Researcher —- University of Cincinnati Feb 2026 – Present

- Owned end-to-end design and build of a two-stage LLM automation pipeline decoupling video understanding from device automation, evaluated against **ViBR** baseline across 53 runs on 20+ apps.
- Demonstrated **25.7x latency reduction** (39.4s vs 1012.1s avg per run) by identifying and fixing redundant per-scene inference, an operational metric that shaped the final architecture.

Software Development Engineer —- Siemens Industry Software Jul 2022 – Jun 2024

- Built backend automation tool-set in Python (Boto3) against AWS services (EC2, S3), replacing legacy scripts and reducing deployment time by **40%** for internal engineering teams.
- Owned **44 production environment upgrades** in 4 months end to end, diagnosing live infrastructure issues across Linux, EC2, and databases and pushing production changes multiple times a week.
- Designed **Ansible-based Blue-Green deployment** automation, reducing production upgrade downtime by **50%** and enabling reliable rollback.
- Built self-service developer dashboard and CLI/YAML automation for environment lifecycle management, adopted by **15 engineers**, cutting provisioning turnaround **70%** using operational usage metrics to drive improvements.
- Served as Quality Coach and SonarQube Specialist, increasing automated code coverage from **35% to 78%**; mentored **5 software engineers** through structured onboarding.

Software Developer Intern —- Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of AWS resources with **Terraform**, reducing deployment time by **30%**.
- Developed **Go + Terratest** framework, catching **95%** of misconfigurations pre-production.

Software Developer Intern —- Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** workflow application that digitized departmental record management, automated manual processes, and improved operational efficiency by **40%**.

PROJECTS AND RESEARCH

PolicyPilot – Medical Benefit Policy Intelligence Portal [React, TS, Node, AWS, MCP] May 2026

- Owned full stack build end to end (frontend, backend, database, automated testing) of a healthcare eligibility tool with evidence-grounded RAG pipeline eliminating hallucination in high-stakes decisions.
- Designed **17-tool MCP server** with Zod schema validation and Vitest test coverage, exposing structured tool-calling APIs for PA extraction and cross-payer comparison to external automation agents.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
