Cincinnati, OH

SUMMARY

Cloud Engineer with production experience designing and automating AWS infrastructure, Kubernetes deployments, and CI/CD pipelines using Terraform, Ansible, Python, and GitLab CI/CD, with strengths in monitoring, security, and infrastructure-as-code.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Deep Learning, Intelligent Data Analysis, Database Theory.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Machine Learning, Object-Oriented Programming.

TECHNICAL SKILLS

Cloud Platforms: AWS (S3, EC2, Lambda, SQS), Microsoft Azure, Google Cloud Platform.

Infrastructure as Code: Terraform, Ansible, CloudFormation, Terragrunt.

Containers & Orchestration: Docker, Kubernetes, ArgoCD, Helm.

CI/CD & Automation: Jenkins, GitLab CI/CD, Git, Python, Bash, PowerShell.

Monitoring & Security: CloudWatch, Datadog, SonarQube, HashiCorp Vault, IAM.

Programming & Databases: Java, JavaScript, Go, SQL, PostgreSQL, MySQL, Linux.

WORK EXPERIENCE

Software Development Engineer —- Siemens Industry Software Jul 2022 – Jun 2024

- Automated **Teamcenter X** cloud infrastructure workflows with Python (Boto3), replacing legacy Ruby scripts and reducing deployment time by **40%** across AWS environments.
- Executed **44 production environment upgrades** in 4 months, monitoring system performance and diagnosing live infrastructure issues across Linux, EC2, databases, and Teamcenter X services.
- Designed **Ansible-based Blue-Green deployment** framework, reducing production upgrade downtime by **50%** and enabling reliable rollback and recovery.
- Migrated **40+ production environments** to Kubernetes using ArgoCD, Helm, GitLab CI/CD, Amazon EFS, and HashiCorp Vault, automating deployment pipelines and strengthening security posture.
- Managed HashiCorp Vault secrets and IAM access policies while serving as SonarQube Specialist, increasing automated code coverage from **35% to 78%** to enforce compliance and security standards.

Software Developer Intern —- Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of **AWS** resources with **Terraform**, reducing deployment time by **30%** and standardizing infrastructure across environments.
- Developed **Go + Terratest** validation framework, catching **95%** of misconfigurations pre-production; used Terragrunt to ensure 100% successful Terraform runs.

Software Developer Intern —- Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** workflow application that digitized departmental record management, automated manual processes, and improved operational efficiency by **40%**.

PROJECTS AND RESEARCH

NYC Mobility Forecasting [PySpark, Delta Lake, Docker, Oracle Cloud, FastAPI] Jul 2026

- Built ML system forecasting NYC taxi/rideshare demand across **263 zones** (**2.3M-row** hourly dataset); containerized with Docker and deployed on Oracle Cloud, serving predictions via a FastAPI REST API integrated with PostgreSQL and Redis.

PolicyPilot – Medical Benefit Policy Intelligence Portal [React, TS, Node, Docker, Gemini] May 2026

- Architected evidence-grounded **RAG pipeline** over Google Gemini 2.5-flash with Zod schema validation at every data boundary, deployed as a containerized full-stack service on Railway.
- Designed **17-tool MCP server** exposing structured LLM tool-calling for PA extraction and cross-payer comparison, consumable by external AI agents.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
