Cincinnati, OH

SUMMARY

Software Engineer and M.S. Computer Science candidate (Dec 2026) with hands on object-oriented programming, automated testing, and quality engineering experience at Siemens. Skilled in C/C++, Python, and Go, building test frameworks, CI/CD quality gates, and validation tooling for production infrastructure.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Database Theory, Object-Oriented Design.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Object-Oriented Programming, Data Analytics, Machine Learning.

TECHNICAL SKILLS

Programming: C/C++, Java, Python, Go, JavaScript, TypeScript, SQL.

Testing: Automated Test Frameworks, Unit/Integration Testing, Terratest, JUnit, Pytest, Object-Oriented Design, Test-Driven Development.

Systems & Infrastructure: Linux, Embedded/Runtime Environments, REST APIs, Microservices, Agile/Scrum, SDLC.

Developer Tools: Git, GitLab CI/CD, Jenkins, AWS, Docker, Kubernetes, Terraform, Ansible, SonarQube, Bash.

Quality & Collaboration: Code Review, CI/CD Quality Gates, Cross-team Communication, Documentation, Mentoring.

WORK EXPERIENCE

Software Development Engineer —- Siemens Industry Software Jul 2022 – Jun 2024

- Served as Quality Coach and SonarQube Specialist, writing automated tests and enforcing CI/CD quality gates that raised automated code coverage from **35% to 78%** across the Agile Release Train.
- Designed **Ansible-based Blue-Green deployment** test and rollback framework, verifying **44 production environment upgrades** in 4 months across Linux, EC2, and Teamcenter X services with zero unresolved defects.
- Automated Teamcenter X infrastructure workflows with Python (Boto3) using object-oriented design, replacing legacy Ruby scripts and reducing deployment time by **40%** across AWS environments.
- Migrated **40+ production environments** to Kubernetes using ArgoCD, Helm, and GitLab CI/CD, building repeatable test and validation pipelines for each release.
- Mentored **5 software engineers** on testing standards and structured onboarding, improving attention to detail and code quality across the team.

Software Developer Intern —- Siemens Industry Software Mar 2022 – Jun 2022

- Developed **Go + Terratest** automated test framework for infrastructure code, catching **95%** of misconfigurations pre-production before they reached runtime environments.
- Automated provisioning and validation of AWS resources with **Terraform**, reducing deployment time by **30%** while ensuring 100% successful test runs.

Software Developer Intern —- Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** workflow application using object-oriented design, digitizing departmental record management and improving operational efficiency by **40%**.

PROJECTS AND RESEARCH

Android Bug Reproduction Research [Python, ADB, uiautomator2, scikit-image] Feb 2026 – Present

- Built a device automation test harness (uiautomator2/ADB) with stall detection for a two-stage LLM pipeline reproducing Android GUI bugs, achieving **25.7x latency reduction** over the ViBR baseline across 53 runs on 20+ apps.

PolicyPilot – Medical Benefit Policy Intelligence Portal [React, TS, Node, Zod, Vitest] May 2026

- Designed 17-tool MCP server with Zod schema validation at every data boundary and Vitest unit/integration test coverage, eliminating a class of runtime type-mismatch bugs across all external tool calls.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
