EDUCATION

Master of Science in Computer Science - University of Cincinnati — Aug 2024 - Dec 2026
Relevant Coursework: Advanced Algorithms, Deep Learning, Intelligent Data Analysis, Database Theory.

Bachelor of Engineering in Computer Engineering - AISSMS College of Engineering — Aug 2018 - Jul 2022
Relevant Coursework: Data Mining, Data Analytics, Machine Learning, Object-Oriented Programming.

TECHNICAL SKILLS

Developer Tools: AWS, Jenkins, Git, GitLab CI/CD, Docker, Kubernetes, ArgoCD, Helm, Terraform, Linux, Bash, SonarQube, Azure, Google Cloud Platform.
Programming & Scripting: Python, Go, Java, SQL, JavaScript, TypeScript, C/C++.
Web Backend: REST APIs, FastAPI, Flask, Django, Node.js, React, HTML/CSS.
Databases: PostgreSQL, MySQL.

WORK EXPERIENCE

Siemens Industry Software (Software Development Engineer) — Jul 2022 - Jun 2024
Tech Stack: AWS, Python, Boto3, REST APIs, Hashicorp Vault, Ansible, GitLab CI/CD, Shell, Kubernetes, ArgoCD, Helm, Amazon EFS

- Automated Teamcenter X infrastructure workflows with **Python (Boto3)**, replacing legacy Ruby scripts and reducing deployment time by **40%** across AWS environments
- Executed **44 production environment upgrades** in 4 months, diagnosing and resolving live infrastructure issues across Linux, EC2, databases, and Teamcenter X services
- Designed Ansible-based Blue-Green deployment framework, reducing production upgrade downtime by **50%** while enabling reliable rollback and recovery
- Migrated 40+ production environments from process-based deployments to **Kubernetes** using ArgoCD, Helm, **GitLab CI/CD**, Amazon EFS, and HashiCorp Vault to modernize deployment architecture
- Served as Quality Coach and **SonarQube** Specialist for the Agile Release Train, increasing automated code coverage from 35% to **78%** by enforcing coding standards and CI/CD quality gates
- Mentored 5 software engineers through structured onboarding, technical documentation, and standardized development practices, accelerating team productivity

Siemens Industry Software (Software Developer Intern) — Mar 2022 - Jun 2022
Tech Stack: AWS, Terraform, Ansible, Terratest, Go

- Automated provisioning of AWS resources with **Terraform**, reducing deployment time by **30%**
- Developed Go + Terratest framework, catching **95%** of misconfigurations pre-production
- Optimized DevOps workflows with **Ansible**, reducing environment setup time from hours to minutes
- Enhanced infrastructure validation with Terragrunt ensuring **100%** successful Terraform runs

PROJECTS AND RESEARCH

PolicyPilot - Medical Benefit Policy Intelligence Portal — May 2026
Tech Stack: React, TypeScript, Node.js, Express, Google Gemini, MCP, Docker, Zod, FHIR, Railway

- Built Docker-based multi-stage deployment on Railway with health-check endpoints (**/api/health, /health**) and auto-restart on failure for a full-stack TypeScript healthcare app
- Designed 17-tool MCP server with **Zod schema validation** at every data boundary, eliminating a class of runtime type-mismatch bugs across all external tool calls
- Set up GitHub Actions CI/CD pipeline (test to build to deploy to health-check gate) with Vitest unit/integration tests and axe-core accessibility coverage

Spotify Personal Analytics Platform — 2026-07-05
Tech Stack: React 19.1.1, TypeScript 5.9.3, Vite 7.1.7, Material UI 7.3.4, MUI X Charts 8.14.0, Zustand 5.0.8, React Router 7.9.4, Axios 1.12.2, Python, FastAPI, Uvicorn, Pydantic, pandas, scikit-learn, PostgreSQL (Supabase), spotipy (Spotify Web API), lyricsgenius (Genius API), musixmatch-api, Netlify (frontend deploy), Render (backend deploy)

- Engineered a 4-stage **Python ETL pipeline** processing 71K+ streaming events with custom rate limiting and exponential-backoff retry handling against a third-party API
- Implemented checkpointing and multi-source API fallback with automatic failure-based source disabling to keep long-running ingestion jobs resilient to mid-run failures
- Designed a **PostgreSQL** analytics schema with materialized views, composite/partial indexes, and 16 SQL RPC functions, enabling low-latency pre-aggregated queries

EXTRACURRICULAR ACTIVITIES

- Finalist at RevolutionUC 2025 Hackathon, among **300 participants from 31 schools**
- Earned **SAFe Practitioner 5.1 Certification** (Mar 2023)
