Cincinnati, OH

SUMMARY

Software Engineer and M.S. Computer Science candidate (Dec 2026) with hands-on experience across cloud platforms (AWS, Azure, GCP), DevOps (CI/CD, Docker, Terraform), and Generative AI (RAG, LLMs, LangChain, prompt engineering). Skilled in Python, Java, SQL, JavaScript, and React, with a consulting mindset built on client-facing problem solving, fast learning, and clear technical communication.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Deep Learning, Intelligent Data Analysis, Database Theory.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Machine Learning, Object-Oriented Programming.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, TypeScript, SQL, C/C++, Go.

Web & Backend: React, Node.js, Django, Flask, FastAPI, REST APIs, Express.js.

Databases: PostgreSQL, MySQL, Databricks, PySpark.

Cloud & DevOps: AWS, Azure, Google Cloud Platform, Docker, Kubernetes, Terraform, Ansible, GitLab CI/CD, Jenkins, ArgoCD, Helm, Git, Linux, Bash.

Generative AI: RAG, LLM Agents, Prompt Engineering, LangChain, Gemini, Vertex AI, PyTorch, TensorFlow, scikit-learn.

WORK EXPERIENCE

Graduate Researcher | University of Cincinnati Feb 2026 – Present

- Designed two-stage memory-augmented LLM agent pipeline in Python using Google Gemini and Vertex AI, decoupling video understanding from device automation for Android GUI bug reproduction, evaluated across 53 runs on 20+ apps.
- Demonstrated **25.7x latency reduction** (39.4s vs 1012.1s avg per run) versus a GPT-4o-based baseline while preserving task-completion fidelity, applying prompt engineering to control agent behavior.

Software Development Engineer | Siemens Industry Software Jul 2022 – Jun 2024

- Automated **Teamcenter X** infrastructure workflows with Python (Boto3) on AWS, replacing legacy Ruby scripts and reducing deployment time by **40%** across cloud environments.
- Executed **44 production environment upgrades** in 4 months, diagnosing live infrastructure issues across Linux, EC2, databases, and application services for internal stakeholders.
- Built CI/CD pipelines and Docker/Kubernetes deployments with GitLab CI/CD, ArgoCD, and Helm, migrating **40+ production environments** and cutting upgrade downtime by **50%** via a Terraform and Ansible driven Blue-Green framework.
- Served as Quality Coach and SonarQube Specialist, increasing automated code coverage from **35% to 78%**; mentored **5 software engineers** through structured onboarding and technical documentation.

Software Developer Intern | Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of AWS resources with **Terraform**, reducing deployment time by **30%**.
- Developed **Go + Terratest** framework, catching **95%** of misconfigurations pre-production.

Software Developer Intern | Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** workflow application that digitized departmental record management, automated manual processes, and improved operational efficiency by **40%** for department stakeholders.

PROJECTS AND RESEARCH

PolicyPilot – Policy Intelligence Portal [React, TS, Node, Gemini, MCP] May 2026

- Architected evidence-grounded **RAG pipeline** over Google Gemini 2.5-flash, forcing citation-backed answers to eliminate hallucination in high-stakes healthcare eligibility decisions, and communicated tradeoffs to non-technical stakeholders.
- Designed **17-tool MCP server** exposing structured LLM tool-calling for PA extraction, patient-readiness evaluation, and cross-payer comparison, consumable by external AI agents.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
