Cincinnati, OH

SUMMARY

Software Engineer and M.S. Computer Science candidate (Dec 2026) with experience writing test automation and Python tooling across CI/CD pipelines, Kubernetes environments, and REST APIs, plus a track record raising automated code coverage and triaging live production issues.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Deep Learning, Database Theory.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Object-Oriented Programming.

TECHNICAL SKILLS

Programming: Python, Java, Go, C/C++, JavaScript, TypeScript, SQL, Bash/Unix Shell.

Web & Backend: REST APIs, HTML/CSS, Node.js, Flask, FastAPI, Microservices.

Databases: PostgreSQL, MySQL, pgAdmin4, Databricks.

Developer Tools: Git, GitLab CI/CD, Jenkins, Jira, Kubernetes, Docker, ArgoCD, Helm, Terraform, AWS, Azure, Google Cloud Platform, SonarQube, Linux.

Testing & Quality: Unit Testing, TDD, JUnit, Pytest, Terratest.

WORK EXPERIENCE

Graduate Researcher | University of Cincinnati Feb 2026 – Present

- Built Python test-automation harness (uiautomator2/ADB) with stall detection and history-windowed decision loop to execute and validate inferred actions across evaluation runs.
- Designed staged, config-driven experimental harness (–stage 1/2/all) with dry-run validation, evaluated across **53 runs** on 20+ Android apps against a published baseline, achieving **25.7x** latency reduction.

Software Development Engineer | Siemens Industry Software Jul 2022 – Jun 2024

- Automated Teamcenter X infrastructure workflows with **Python** and Unix shell scripting, replacing legacy Ruby scripts and cutting deployment time by **40%** across AWS environments.
- Executed **44 production environment upgrades** in 4 months, triaging and resolving live infrastructure issues across Linux, EC2, and databases with precision and accuracy.
- Migrated **40+ production environments** to **Kubernetes** using ArgoCD, Helm, GitLab CI/CD, and HashiCorp Vault, applying Kubernetes CLIs and architecture principles daily.
- Served as Quality Coach and SonarQube Specialist, increasing automated code coverage from **35% to 78%**; managed **Git** branching/review/merge workflows and mentored **5 engineers**.

Software Developer Intern | Siemens Industry Software Mar 2022 – Jun 2022

- Developed **Go + Terratest** test-automation framework, catching **95%** of misconfigurations pre-production before deployment.
- Automated provisioning of AWS resources with **Terraform**, reducing deployment time by **30%**.

Software Developer Intern | Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** workflow application that digitized departmental record management and improved operational efficiency by **40%**.

PROJECTS AND RESEARCH

NYC Mobility Forecasting [Python, PySpark, SQL, FastAPI] Jul 2026

- Built ML system forecasting NYC taxi/rideshare demand across **263 zones** (**2.3M-row** dataset); improved MAPE **18.77% to 16.52%** and cut RMSE **43%** over baseline.
- Built RESTful API (Python, FastAPI) serving real-time predictions, integrated with PostgreSQL and Redis, containerized with Docker.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
