Cincinnati, OH

SUMMARY

Software Engineer and M.S. Computer Science candidate (Dec 2026) with production experience building and maintaining internal full-stack web applications using JavaScript, TypeScript, React, Node.js, HTML/CSS, and SQL. Strong in object-oriented programming, database work, debugging, testing, and shipping features from department requirements.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Database Theory, Intelligent Data Analysis.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Object-Oriented Programming, Data Mining, Data Analytics.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Java, Python, SQL, C/C++, Go, HTML5, CSS3, PowerShell.

Web & Backend: React, Node.js, Express, HTML/CSS, REST APIs, Flask, FastAPI, Django.

Databases & Data: PostgreSQL (pgAdmin4), MySQL, SQL, PySpark, Databricks-style medallion pipelines, pandas.

Testing & Practices: Jest, Pytest, JUnit, Vitest, Unit/Integration Testing, OOP, Design Patterns, Agile/Scrum.

Developer Tools: Git, GitLab CI/CD, Jenkins, Docker, Kubernetes, AWS, Linux, Bash, Postman, VS Code.

WORK EXPERIENCE

Graduate Researcher | University of Cincinnati Feb 2026 – Present

- Built config-driven Python automation harness with device-control loop and stall detection for Android GUI testing; demonstrated **25.7x latency reduction** vs the **ViBR** baseline across 53 runs on 20+ apps while preserving task-completion fidelity.

Software Development Engineer | Siemens Industry Software Jul 2022 – Jun 2024

- Automated infrastructure workflows with Python, replacing legacy Ruby scripts and reducing deployment time by **40%**; wrote clean, maintainable code reviewed against team standards.
- Executed **44 production environment upgrades** in 4 months, diagnosing and resolving live issues across Linux, databases, and backend services with fast turnaround under pressure.
- Served as Quality Coach and SonarQube Specialist, raising automated test coverage from **35% to 78%** by enforcing coding standards and CI/CD quality gates across engineering teams.
- Collaborated with 15+ engineers across teams to gather requirements and ship a self-service dashboard plus CLI for environment lifecycle management; mentored **5 engineers** through structured onboarding.

Software Developer Intern | Government of Maharashtra, Water Resource Department Sep 2021 – Dec 2021

- Built and deployed a full-stack **React and MySQL** internal workflow application that digitized departmental record management, working directly with staff to gather requirements and implement features, improving operational efficiency by **40%**.

Software Developer Intern | Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of cloud resources with **Terraform**, reducing deployment time by **30%**.
- Developed **Go + Terratest** test framework, catching **95%** of misconfigurations pre-production.

PROJECTS AND RESEARCH

Spotify Personal Analytics Platform [React, TypeScript, Node, FastAPI, PostgreSQL] Jul 2026

- Built a full-stack internal analytics web app (React/MUI dashboard + FastAPI backend) over a **4-stage Python ETL pipeline** processing **71K+** events, with rate limiting and retry handling.
- Designed a **PostgreSQL** analytics schema with materialized views, composite/partial indexes, and **16 SQL** functions, enabling low-latency pre-aggregated queries over the data.

PolicyPilot – Policy Intelligence Portal [React, TS, Node, Express, Docker] May 2026

- Built a full-stack **TypeScript** web app (React SPA + Express REST API) unifying document workflows on a single Node.js process, with Zod schema validation and **Vitest** unit/integration tests at every data boundary.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
