Dear Hiring Committee,

I saw the job post in an email from **Siri InfoSolutions** and thought I'd be a good fit for it.

I am a Master's student in Computer Science at the University of Cincinnati, graduating December 2026, looking for a role as a **Teamcenter PLM Consultant** at **Siri InfoSolutions**. With two years of hands on experience automating, upgrading, and troubleshooting Teamcenter X production environments, I am excited about the opportunity to contribute to **Siri InfoSolutions** and support **your client's Teamcenter deployment, administration, and infrastructure work in San Jose**.

Here are reasons that make me a great fit for the role:

- **Hands on Teamcenter platform experience:** At Siemens Industry Software, I automated Teamcenter X infrastructure workflows with Python (Boto3), replacing legacy Ruby scripts and cutting deployment time by 40% across AWS environments. My Teamcenter experience is closer to two years than five, but it was entirely production focused.

- **Linux and container based environments:** I migrated 40+ production environments from process based deployments to Kubernetes using ArgoCD, Helm, GitLab CI/CD, Amazon EFS, and HashiCorp Vault, working daily across Linux, EC2, and databases, and I am comfortable with Docker.

- **Setting up environments end to end:** I cut environment provisioning turnaround by 70% (10 min to 3 min) with a CLI and YAML driven workflow, and automated AWS resource provisioning with Terraform, reducing deployment time by 30%.

- **Maintenance, upgrades, and lifecycle management:** I executed 44 production environment upgrades in 4 months and designed an Ansible based Blue-Green deployment framework that reduced production upgrade downtime by 50% while enabling reliable rollback and recovery.

- **Troubleshooting and cross functional collaboration:** I diagnosed and resolved live infrastructure issues across Linux, EC2, databases, and Teamcenter X services. As Quality Coach for the Agile Release Train, I raised automated code coverage from 35% to 78% and mentored 5 software engineers.

I am available for full-time work after my graduation in December 2026. As a Master's student at the University of Cincinnati and someone who values professionalism and growth, I am enthusiastic about contributing to **reliable, secure, and well maintained Teamcenter environments**.

Please find my CV attached below. I look forward to hearing from you. **I would be glad to help keep a Teamcenter platform dependable for the teams that rely on it**.
