Cincinnati, OH

SUMMARY

DevOps Engineer with two years at Siemens running production Kubernetes migrations, Blue-Green deployments, and GitLab CI/CD pipelines on AWS, building Infrastructure as Code with Terraform and Ansible and automating environment lifecycle in Python. Strong in live production debugging and GitOps delivery. Currently an M.S. Computer Science candidate (Dec 2026).

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Deep Learning, Intelligent Data Analysis, Database Theory.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Machine Learning, Object-Oriented Programming.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, Google Cloud Platform, Azure, Docker, Kubernetes, ArgoCD, Helm, Terraform, Ansible.

CI/CD & Automation: GitLab CI/CD, Jenkins, Git, Bash, Python scripting, Nginx, HashiCorp Vault.

Databases & Caching: PostgreSQL, MySQL, Redis, Elasticsearch.

Networking & Reliability: Linux, TCP/IP, DNS, SSL, VPC, SonarQube, HA/Backup design.

Programming: Java, Python, JavaScript, TypeScript, Go, SQL.

WORK EXPERIENCE

Graduate Researcher | University of Cincinnati Feb 2026 – Present

- Built config-driven experimental automation harness with uiautomator2/ADB device-orchestration, stall detection, and a history-windowed decision loop, evaluated across **53 runs** on 20+ Android apps.
- Cut average run time from **1012.1s to 39.4s** (**25.7x latency reduction**) versus the ViBR baseline while preserving task-completion fidelity via single-pass video-to-memory extraction.

Software Development Engineer | Siemens Industry Software Jul 2022 – Jun 2024

- Migrated **40+ production environments** from process-based deployments to Kubernetes using ArgoCD, Helm, GitLab CI/CD, Amazon EFS, and HashiCorp Vault, modernizing cloud-native deployment architecture.
- Designed **Ansible-based Blue-Green deployment** framework, reducing production upgrade downtime by **50%** with automated rollback and recovery.
- Automated **Teamcenter X** infrastructure workflows with Python (Boto3), replacing legacy Ruby scripts and reducing deployment time by **40%** across AWS environments.
- Executed **44 production environment upgrades** in 4 months, diagnosing live infrastructure issues across Linux, EC2, databases, and Teamcenter X services.
- Served as Quality Coach and SonarQube Specialist, increasing automated code coverage from **35% to 78%**; mentored **5 software engineers** through structured onboarding.

Software Developer Intern | Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of AWS resources with **Terraform**, cutting deployment time by **30%** and standardizing repeatable environment setup as reusable Infrastructure as Code modules.
- Developed **Go + Terratest** validation framework, catching **95%** of infrastructure misconfigurations pre-production, and optimized **Ansible** workflows cutting setup from hours to minutes.

PROJECTS AND RESEARCH

NYC Mobility Forecasting [PySpark, Delta Lake, PostgreSQL, Redis, Docker] Jul 2026

- Built ML system forecasting NYC taxi/rideshare demand across **263 zones** (**2.3M-row** dataset) via a Spark medallion pipeline over Delta Lake; served via containerized **FastAPI** backend with PostgreSQL/Redis caching, CI/CD, and free-tier Oracle Cloud deployment.

PolicyPilot – Medical Benefit Policy Intelligence Portal [React, TS, Node, Docker, MCP] May 2026

- Built full-stack TypeScript app (React SPA + Express 5 REST API + **17-tool MCP server**) with Zod schema validation at every data boundary; containerized on Docker/Railway with an evidence-grounded **RAG pipeline** over Gemini 2.5-flash forcing citation-backed answers.

CERTIFICATIONS & ACTIVITIES

- **SAFe Practitioner 5.1** (Mar 2023) | **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools).
