Cincinnati, OH

SUMMARY

DevOps and Software Engineer, M.S. Computer Science candidate (Dec 2026), with two years building and operating highly available cloud infrastructure at Siemens. Automated deployment, configuration, and monitoring with PowerShell, Bash, Terraform, and CI/CD pipelines across Azure, AWS, Docker, and Kubernetes, with on-call production incident response experience.

EDUCATION

Master of Science in Computer Science Aug 2024 - Dec 2026
University of Cincinnati
Relevant Coursework: Advanced Algorithms, Deep Learning, Intelligent Data Analysis, Database Theory.

Bachelor of Engineering in Computer Engineering Aug 2018 - Jul 2022
AISSMS College of Engineering
Relevant Coursework: Data Mining, Data Analytics, Machine Learning, Object-Oriented Programming.

TECHNICAL SKILLS

Programming: Python, PowerShell, Bash, Java, JavaScript, TypeScript, SQL, Go, C/C++.

Cloud & DevOps: Microsoft Azure, Azure DevOps, AWS, Google Cloud Platform, Docker, Kubernetes, Terraform, Ansible, Helm, ArgoCD, GitLab CI/CD, Jenkins, Linux.

Infrastructure & Ops: Infrastructure as Code, CI/CD Pipelines, GitOps, Monitoring, Incident Response, HashiCorp Vault, Nginx, Microservices.

Databases: PostgreSQL, MySQL, Redis, DynamoDB, MongoDB.

Version Control & Collaboration: Git, GitHub, SonarQube, Jira, Confluence, Agile/Scrum, SAFe.

WORK EXPERIENCE

Software Development Engineer (DevOps) | Siemens Industry Software Jul 2022 – Jun 2024

- Supported design, implementation, and maintenance of highly available **Teamcenter X** infrastructure on cloud, automating deployment and configuration workflows with **Python and Boto3**, replacing legacy Ruby scripts and reducing deployment time by **40%**.
- Executed **44 production environment upgrades** in 4 months and participated in on-call rotation, diagnosing and resolving live infrastructure and application issues across Linux, EC2, databases, and services to ensure maximum uptime.
- Developed and maintained **GitOps CI/CD pipelines** with GitLab CI/CD and ArgoCD, enabling automated, auditable, rollback-capable deployments across **40+ environments**; migrated them to **Kubernetes** with Helm.
- Designed **Ansible-based Blue-Green deployment** framework, cutting production upgrade downtime by **50%**; monitored performance with CloudWatch and Datadog, optimizing resources to cut monthly cloud spend **40%**.
- Served as Quality Coach and SonarQube Specialist, raising automated code coverage from **35% to 78%** via CI/CD quality gates; mentored **5 engineers** through structured onboarding.

Software Developer Intern (DevOps) | Siemens Industry Software Mar 2022 – Jun 2022

- Automated provisioning of cloud resources with **Terraform** as infrastructure as code, reducing deployment time by **30%** and standardizing environment setup.
- Developed **Go and Terratest** validation framework, catching **95%** of misconfigurations before production and improving deployment reliability.

Graduate Researcher | University of Cincinnati Feb 2026 – Present

- Built config-driven automation harness in **Python** for LLM-powered Android GUI bug reproduction, achieving **25.7x latency reduction** over the ViBR baseline across 53 runs on 20+ apps.

PROJECTS AND RESEARCH

PolicyPilot – Medical Benefit Policy Portal [React, TS, Node, Docker, Gemini, MCP] May 2026

- Built full-stack **TypeScript** healthcare app (React SPA + Express REST API + MCP server) unifying insurance prior-authorization workflows, containerized with **Docker**; architected evidence-grounded **RAG pipeline** forcing citation-backed answers to cut hallucination in eligibility decisions.

NYC Mobility Forecasting [Python, PySpark, FastAPI, PostgreSQL, Redis, Docker] Jul 2026

- Built ML system forecasting NYC taxi demand across **263 zones** (**2.3M-row** dataset); served predictions via FastAPI with **PostgreSQL and Redis caching**, containerized with Docker for cloud deployment.

EXTRACURRICULAR ACTIVITIES

- **Finalist, RevolutionUC 2025 Hackathon** (300 participants, 31 schools) | **SAFe Practitioner 5.1** (Mar 2023).
